## ABOUT ME

For over several years, my interests have oscillated around programming.

I started gaining experience with a bootcamp, which lasted 9 months. Then I learned the basics: HTML, CSS, RWD, Bootstrap, Git, JavaScript ES6, AJAX, React, Redux, NPM, Webpack.

In addition, for two years I expanded my knowledge related to IT during lessons taken from an experienced senior programmer, with his help I improved my workshop related to React.
